	Air Quality Division RESCISSION OF POLICY AND PROCEDURE		DEPARTMENT OF ENVIRONMENTAL QUALITY
Rescinded Date: January 29, 2014	Subject: Operational Memorandum No. 3		Category: <input type="checkbox"/> Internal/Administrative x External/Non-Interpretive <input type="checkbox"/> External/Interpretive
	Title: Procedure for Limiting Potential to Emit below Major Source Thresholds under the Renewable Operating Permit Program		
	Number: AQD-003	Page: 1 of 1	

Air Quality Division Operational Memorandum No. 3, Procedure for Limiting Potential to Emit below Major Source Thresholds under the Renewable Operating Permit Program, dated February 14, 1997, is rescinded. This Op Memo identifies the ability to stay below the major source threshold by obtaining a permit to install that limits potential to emit. The authority for such limit is in Rule 205; this educational material has since been included in other outreach documents. Thus no policy or procedure is needed.

DIVISION CHIEF APPROVAL:

G. Vinson Hellwig, Chief
Air Quality Division
